

# Relief Coordination & Information Management System (SAHANA)

---

Jayanthi Somasekaram  
CHA

31<sup>st</sup> July 2009

## Introduction to SAHANA system

An initiative by MRDRS (Ministry of Resettlement & Disaster Relief Services)

### Objectives

- Coordinate IDP Camp activities and their needs
- Coordinate Line Ministries, INGOs and NGOs Activities
- Provide accurate information about IDPs
- Sharing IDP Statistics and Information
- Support to find solutions for Organizations facing issues
- Support to accelerate the resettlement process

## System Modules

### Main Modules in the system;

- Missing Person and Disaster Victim Registry
- IDP Camp Registry
- Organization Registry
- Project Monitoring
- Inventory Management
- Request Management
- Issues Reporting

## System Modules cont...

### Missing Person and Disaster Victim Registry

- Record data of displaced people (biometric data and photo)
- Find missing, deceased, injured and displaced people and families

### IDP Camp Registry

- To keep track of temporary IDP camps and Relief Villages  
*Eg: Population, Contact info, Services available, Needs, etc...*
- Provides statistics of IDP distribution in the Camps
- Record camp needs and request items and services

## System Modules cont...

### Organization Registry

- Keeps track of all organizations working in the disaster region and in different sectors
- Captures information of the range of services provided by them

### Project Monitoring

- Keeps track of projects of organizations and project progress in a timely manner
- A tool for avoiding duplication of work

### Inventory Management

- Keeps track of all aid items and supplies of organizations
- Enables diverse groups of users to interact and manage stocks located around the region

## System Modules cont...

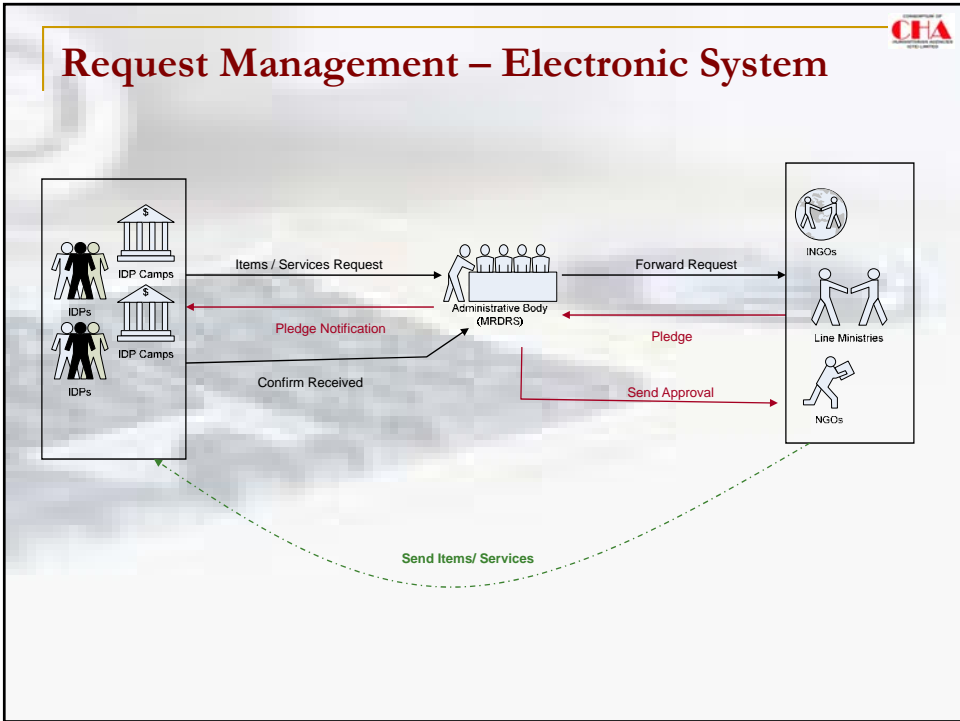

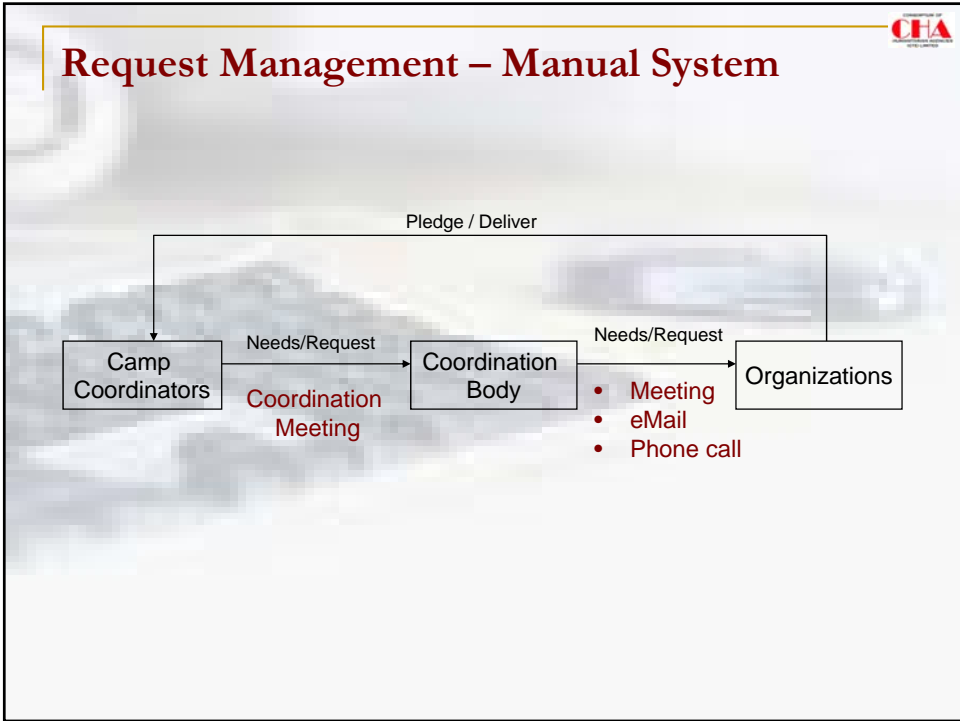

### Request Management

- Central online repository where the relief organizations and relief workers coordinate virtually with ministries and camps and ensure the supply of aids for the demand.
- Helps to allocate the available resources to fulfill the demands effectively and efficiently

### Issues Reporting

- A module where organizations can report their issues and request for assistance
- Issues will be passed on to relevant authorities by the system administrator for solutions and response can be seen through the system

## Role of CHA

- Collect data from organisations  
([Org. Registry](#) and [Projects/Inventory/Issues](#))
- Register the organisations in the system
- Initiate updates on behalf of the organisations  
(Projects, Inventory and Issues)
- Coordinate with MRDRS and ensure the consistency and availability of the system

## Current Status

- Requested for details from 52 Agencies
- Received Response from 20 Agencies
- All 20 been registered to the system
- Projects/Inventory/Issues are updated
